-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 May 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 2627

1. Applicant's election without traverse of Group I, claims 1 and 2 in the reply filed on 5/2/06 is acknowledged.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rao et al (US. 6,545,842 B2).

Rao discloses a magnetic head supporting structure having a magnetic head support structure component (114, 116) having a surface with inclusions (V denticles 170 and 172; figures 3 and 5).

Rao does not clearly disclose that there are less than 40 inclusions and having largest dimension between 0.5 μ m and 2 μ m per square millimeter (claims 1 and 2) , having hardness 4 or higher on Moh's Scale (claim 2).

However, Rao discloses that "both the shape and the size or radius of the dimples 172 may be optimized for different actuator arms 114 and different suspensions 116".

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the magnetic head supporting structure component having are less than 40 inclusions and having largest dimension between 0.5 μ m and 2 μ m per square millimeter (claims 1 and 2) , having hardness 4 or higher on Moh's Scale (claim 2) through routine lab experimentation and optimization of number

of inclusions, dimension and hardness as recited to reduce aerodynamic drag forces experienced by the actuator assembly, thus reduce read/write errors due to drag-induced vibrations on the heads of the disc drive.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allen T. Cao whose telephone number is (571) 272-7569. The examiner can normally be reached on Mon - Thurs (7:30 - 6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa T. Nguyen can be reached on (571) 272-7579. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
